PREFACE

A DIRECTORY of nurserymen, to be such, should include the names of those in the nursery business, whether their business operations be on a large or small scale, because it is to serve many purposes. We are well aware that it is the custom in many cases to use such a directory as a mailing list for the distribution of wholesale catalogues. The inadvisability of this course was pointed out by a Massachusetts member at the last annual meeting of the American Association of Nurserymen. As was well said at that time, the Nursery Directory should be used as the basis for a compilation of a mailing list by each concern, suited to its particular needs.

Every mailing list should be frequently revised in order to keep it up to date. The Nursery Directory is invaluable for this purpose. The selection of names for mailing purposes should be done by comparison of lists and by special investigation when positive knowledge is lacking. That is the only way in which a mailing list of value can be produced.

ARIZONA.

ARIZONA. The horticultural inspection and quarantine law provides for quarantine of nursery stock and may be enforced against states where there is suspected danger to the horticultural interests of the territory. All nursery stock shipped into Arizona from any other state shall be prominently labeled with a certificate of inspection signed by an authorized official of the state in which the stock was grown. Shipments found infested with pests shall be sent out of the territory or destroyed at owner's option. Each carload, box or package shall be legibly marked with the name and address of the consignor and consignee, and name of the place where contents were grown. F. H. CALIFORNIA.

CALIFORNIA. Shipments of nursery stock into California are held by the transportation companies until inspected by state quarantine guardians. All packages must be marked with the name and address of the shipper, name of the consignor and name of the place where the stock is grown. All nursery stock infested with pests not existing in California will be immediately sent out of the state or destroyed at the option of the owner and at his expense. Peach, apricot and almond trees coming from districts where yellows and rosette are known to exist, shall be refused entry and shall be destroyed or returned to the shipper. Notices of shipment of nursery stock to California should be sent to the Horticultural Quarantine Officer, Room 11, Ferry Building, San Francisco, Cal., and to the state quarantine guardians at the point of destination.

COLORADO

COLORADO. The state entomologist has general supervision of the inspection of nurseries and orchards to prevent the introduction, importation or spread of injurious insects and plant diseases. County horticultural inspectors in fruit growing counties of the state are appointed by the county commissioners. All nursery stock coming into the state must bear certificates of inspection and fumigation. All nurseries in the state must maintain fumigation rooms for the treatment of their stock before it is shipped from the nursery. All nursery stock on arriving in counties that have inspectors is turned over to the inspector of the county and is released by him to consignee if it passes inspection. Prof. C. P. IDAHO.

IDAHO. No person, firm or corporation shall import or sell nursery stock without first applying to the State Board of Horticultural Inspection and filing a bond in the sum of \$5,000, and securing firm license upon payment of \$10. No nursery stock can be delivered or disposed of in the state without first having been properly fumigated, and shipments into the state should bear a copy of an official certificate of fumigation emanating from the place where the stock was grown. All shipments into the state must bear a label showing the name of the shipper, the locality where grown, and variety of nursery stock, and all nursery stock, fruit trees, or horticultural plants sold or delivered by principal or agents shall be true to

name and variety as represented. All nursery stock shipped into this state, whether bearing certificate of inspection or not, must be inspected again upon its arrival in the state, the consignee paying for such inspection. Every nursery firm doing business in this state must pay \$1 additional for each agent who represents them. J. U. McPherson, State Horticultural Inspector, Boise, Idaho.

ILLINOIS

ILLINOIS. State nurseries are inspected and certified not later than October 1. An inspection certificate shall be valid for one year from date of inspection. The state entomologist is authorized to revoke a certificate if he finds it is being used in violation of the law. He is also required to furnish all Illinois nurserymen with a list of state and government inspectors whose certificates may be received as equally valid as his own, and the nurseryman receiving stock under such certificate is authorized to substitute for them the Illinois certificate of inspection. Each dealer in nursery stock who has no nursery of his own, and each agent for a nursery located outside of Illinois, is required to furnish to the state entomologist annually a sworn statement, showing that the stock in which he deals has been duly inspected and to submit for approval a copy of the certificate of inspection. Nursery stock shipped into the state must bear a certificate of inspection attached to each car, box, bale, bundle or package. Dr. S. A. Forbes, State Entomologist. Fred T. INDIANA.

INDIANA. All nurseries are inspected between June 1 and October 1, and at such other times as the head of the inspection department may consider advisable. Stock sent into or within the state must be plainly labeled with the name of the consignor and the consignee and must bear a certificate signed by a state or government official, showing that the enclosed stock has been inspected and found free from injurious insects and plant diseases. All foreign-grown stock and stock from Missouri and Iowa must be inspected upon arrival at its destination in Indiana. (Laws of 1907 and 1909.) C. H. Baldwin, State Entomologist, Indianapolis, Ind.

IOWA.

IOWA. State nurseries are inspected at owner's request or if supposed to be infested with dangerously injurious insects or plant disease, and nurserymen are prohibited from selling or shipping without the inspection. Shipments into the state must be accompanied by a certificate of apparent freedom from injurious insects or plant diseases, a copy of which must be filed with and approved by the state entomologist of Iowa. LOUISIANA.

LOUISIANA. Nursery inspection is under the control of the State Board of Agriculture and Immigration. The entomologist of the experiment station will have charge of the work, so all communications concerning nursery inspection should be addressed to him.

The regulations of the board require every box, bundle, bale or package of nursery stock shipped into the state to be plainly labeled with a copy of a valid unexpired certificate of inspection, and nurserymen shipping stock into this state must file a copy of their certificate with the board. No license will be required of nurserymen. J. B. Garrett, Entomologist, state Board of Agriculture and Immigration, Baton Rouge, La.

MAINE.

MAINE. Nurseries within the state are inspected annually. All nursery stock shipped into the state shall bear on each box or package a certificate that the contents have been inspected. The state horticulturist has power to inspect all stock shipped into the state at point of destination, whether under certificate or not and if found infested with any injurious insect or plant disease, he shall cause it to be destroyed or returned to the consignor. Agents or other parties, excepting growers who wish to sell nursery stock, shall make application for an agent's license and shall file with the state horticulturist the names and addresses of parties from whom they purchase stock. Such application shall be accompanied by a fee of ten dollars. A. K. Gardner, State Horticulturist, Augusta, Me., E. F. Hithings, State Horticulturist, Orono.

MASSACHUSETTS.

MASSACHUSETTS. Nurseries in the state are inspected annually. Agents or other persons, excepting growers who desire to sell nursery stock in the state, shall make application to and receive from the state nursery inspector an agent's license, and shall file with the state nursery inspector names and addresses of all persons or nurseries from whom they purchase stock. It shall be unlawful for any person, firm or corporation to sell, deliver or ship within the state any nursery stock, unless such person, firm or corporation holds a grower's certificate or an agent's license and a copy of such certificate or license must accompany each car, box or package delivered or shipped. Every person outside of the state desiring to ship nursery stock into the state shall file a copy of his certificate of inspection and purchase official tags from the state nursery inspector at cost. A copy of the official tag shall be attached to each car, box or package. The state nursery inspector has power to inspect all shipments coming into the state at point of destination and, if infested or infected, may cause it to be returned to consignor or destroyed. MICHIGAN.

MICHIGAN. Nurseries are subject to inspection; infested trees must be destroyed and the remainder of the stock within a half mile must be fumigated. Shipments into the state must bear on every package, plainly labeled, the name of the consignor and consignee, statement of contents, and a certificate showing that the contents have been inspected by a state or government officer, and if of species subject to the attack of San Jose scale must be fumigated with hydrocyanic acid gas. Certificates of fumigation must also be attached, together with a certificate of inspection. This applies to individual orders when several are contained in the same shipment. All nurserymen, whether residents of Michigan or other states, who wish to grow or sell stock within the state, must apply to the state inspector of nurseries on or before August first of each year for a license, for which the fee is \$5. A bond for \$1,000 must also be filed. Certificates of inspection must be filed with the state inspector of nurseries before any stock is shipped into the state. Prof. L. R. Taft, State Inspector of Nurseries, East Lansing, Mich.

MISSISSIPPI.

MISSISSIPPI. Every nursery in the state must be inspected before November 1 of each year, and every bundle, bale, or package of stock sold or transported must be accompanied by a copy of the certificate of inspection attached in a conspicuous place. Every person or firm from other states wishing to ship nursery stock into Mississippi must file with the entomologist a copy of their certificate, which shall state that the nursery is properly equipped for fumigating all nursery stock. A copy of the certificate shall be attached to every bundle, bale or package of nursery stock delivered within the state. Every nurseryman must state that all nursery stock shipped into this state will be fumigated with hydrocyanic acid gas. R. W. Harned, Entomologist, Agricultural College, Miss.

NEVADA

NEVADA. Nursery stock shipped from other states shall bear on the outside of each car, bale or package, a label giving the names of the consignor and consignee, together with a copy of an inspection certificate of recent date. Such certificate of inspection must bear the signature of a qualified person in authority in the state in which such nursery stock was grown. No transportation company shall deliver any nursery stock lacking such official certificate of inspection. J. E. Stubbs, President, State University, Reno, Nev.

THE AMERICAN ASSOCIATION

Membership in the American Association of Nurserymen is an asset in the business of the nurseryman who will study the proceedings, attend the conventions and take part in the discussions of practical trade topics. Write to Secretary John Hall, Granite building, Rochester, N. Y., today, if you are not a member.

NEW HAMPSHIRE.

NEW HAMPSHIRE. Nurseries are inspected at least once each year. Shipments into the state must be accompanied by a certificate of inspection or, in lieu thereof, an affidavit showing that the stock has been fumigated with hydrocyanic acid gas, using not less than 2-10 of one gram of cyanide of potassium per cubic foot of space, in an airtight compartment for not less than forty minutes. A copy of the certificate of inspection, or a copy of the affidavit, must be attached to each car, box or package shipped into the state. Hon. N. J. Bachelder, Secretary, State Board of Agriculture, Concord, N. H. Charles W. Stone, State Nursery Inspector, Durham, New Hampshire.

NEW JERSEY.

NEW JERSEY. The law requires the inspection of all nurseries at least once in each year. Shipments into the state must be accompanied by a certificate of inspection, or copy thereof, attached to each car or parcel, together with a statement from the shipper that the stock therein is a part of the stock inspected and whether such stock has been fumigated with hydrocyanic acid gas or not. If stock comes into the state without a certificate, it may be detained for examination, wherever found, by the state entomologist, and if found to be infested with any insects injurious, or liable to become so, will be destroyed. INDEPENDENT AND FEARLESS

"American Fruits" is not the official journal of any organization. It therefore makes no distinction in favor of any. It is untrammelled in its absolutely independent position and is the only publication of the kind.

Though it happens that its place of publication is in the eastern section of the country, it is thoroughly National in its character and international in its circulation.

Its news and advertising columns bristle with announcements from every corner of the Continent.

It represents, as its name implies, the Fruits of American industry in one of the greatest callings,—Commercial Horticulture in all its phases of Nursery Stock, Orchard Planting and Distribution.

NEW MEXICO.

NEW MEXICO. No law relative to transportation of nursery stock. NEW YORK.

NEW YORK. All nursery stock shipped from any point in the state of New York must have attached to each car, box, bale, or package, a copy of a certificate of inspection issued by the State Department of Agriculture, signed by the Commissioner of Agriculture and valid to September 1, 1912.

All nursery stock shipped into the state must be so shipped as to comply with the requirements of the Agricultural Law. Transportation companies shall immediately upon receiving consignments notify the Commissioner of Agriculture of the fact that such consignments are in their possession or en route to some point within the state and give the name and address of the consignor and consignee and the destination of each shipment and the name of the transportation company bringing such stock and the route or routes over which it is brought and shall also make such further report relative to such shipments as the Commissioner of Agriculture may from time to time require. (Sample forms of notices will be sent on application.)

To Importers of Nursery Stock and Custom House Brokers

Custom house brokers importing or bringing nursery stock into the state shall, immediately upon receiving consignments, notify the Commissioner of Agriculture of the fact that such consignments are in their possession or en route to some point within the state and give the name and address of the consignor and consignee, and the destination of each shipment and the name of the transportation company bringing such stock and the route over which it is brought and shall also make such further report relative to such shipments as the Commissioner of Agriculture may from time to time require. All custom house brokers bringing into or causing to be brought into this state any nursery stock, shall file with the Commissioner of Agriculture, on or before October first each year, the name of the person, firm, association or corporation engaged in or intending to engage in such business, together with the business address of such person, firm, association or corporation. (Blanks will be furnished for this purpose.)

To Dealers in Nursery Stock

All dealers in nursery stock must, if they have no growing nursery stock in this state, file with the Commissioner of Agriculture their name and address, together with a list of all persons, firms or corporations of whom they buy nursery stock. No stock shall be sold, shipped or delivered unless accompanied by a copy of a certificate signed by the Commissioner of Agriculture or his authorized representative, indicating freedom from insect pests and fungous diseases. When all

such stock is collected an inspection will be made and proper certificates provided by this department to permit shipping.

To Nurserymen

All growing nursery stock in the state will be inspected annually and if found free from injurious insect or fungous pests there will be issued to the owner a certificate of inspection, which certificate will expire September 1, 1912.

Every car, box, bundle or package must have attached a copy of said certificate of inspection before shipment or delivery.

All nursery stock found growing within one-half mile of areas infested with San Jose scale must be properly fumigated as required by the regulations of this department before shipment or delivery.

Any nursery stock received from points within the state of New York must not be sold or delivered unless it bears a valid certificate of inspection on arrival.

Any nursery stock brought into the state must remain unpacked or unopened until permission is given by the Commissioner of Agriculture or his duly authorized representative. To facilitate rapid inspection receivers of nursery stock should notify the department office at Albany or an authorized inspector of the receipt or expected receipt of such consignment, giving the name and address of consignor and dates.

No nursery stock shall be shipped or delivered unless there is positive evidence that it has been inspected and certified by authority of the Commissioner of Agriculture.

Information

The state is divided into districts and the nurseries are under the constant care of inspectors of the department. During the shipping season it is the duty of the department to cause an inspection of all nursery stock from points outside the state. All trees infested with San Jose scale or other injurious insects, and all trees and plants infected with fungous diseases, crown gall or galls on the roots, must be destroyed.

The Commissioner of Agriculture exempts from fumigation all herbaceous plants, conifers, greenhouse plants, flowers and cuttings, but this does not refer to stock that may distribute injurious pests. Certificates issued by this department will be valid until September 1, 1912. No certificate will be granted on a final inspection made earlier than August 1, 1911, and the most important inspection work will be done after August 1, and continue throughout the year wherever it is found necessary.

Vineyardists who make a business of selling cuttings, and small fruit growers, who do no general nursery business, will receive a special certificate of inspection. Transportation companies class cuttings as nursery stock and require copies of inspection certificates.

George G. Atwood, Albany
Chief Nursery Inspector

Duplicate certificates of inspection will be furnished by the department for filing in the offices of the states requiring them, as follows: Alabama, Florida, Georgia, Illinois, Iowa, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Mississippi, North Carolina, North Dakota, Oklahoma, South Carolina, Tennessee, Texas, Virginia, Wisconsin and Wyoming. To avoid delay and possible loss of stock, no nurseryman should ship to another state, without first having learned the requirements of that state. George G. Atwood, Chief Bureau of Nursery Inspection, Albany, N. Y.

NORTH CAROLINA.

NORTH CAROLINA. Every shipment of nursery stock into this state must be accompanied by a valid copy of a certificate of inspection, otherwise the shipment is liable to be destroyed. Every person, firm or corporation desiring to ship nursery stock into this state must file a copy of their certificate with the entomologist. It will be of advantage to the nurserymen if they attach a guarantee of fumigation to the shipment. A copy of regulations will be sent on application. NORTH DAKOTA.

NORTH DAKOTA. The director of the ex-
 periment station is authorized to cause in-
 spection and prescribe treatment of diseased
 nursery stock. Shipments into the state
 must bear a certificate of inspection. Every
 person who employs agents or salesmen or
 who solicits for the sale of nursery stock
 must obtain a license upon the payment of
 \$10 and upon filing a certificate of inspection
 and a \$500 bond. Said license will permit
 holder to do business in the state for one
 year. Director, N. D. Experiment Station,
 Agricultural College, N. D.

OKLAHOMA.

OKLAHOMA. Nurseries are inspected annually. The owners of nursery stock who desire to ship into the state of Oklahoma are required to make application for a permit. This permit is issued by the Board of Agriculture, upon the filing of a duplicate certificate of inspection or report of inspection from the state inspector who examined the stock. The application must be accompanied by a remittance of \$5. All shipments into the state must be accompanied by a tag on which is printed a copy of this permit. All agents canvassing for nurseries located outside of the state are required to carry a duplicate of the permit of their principal, which duplicate is issued upon payment of \$1. Price of tags given on application. Benj. F. Hennessy, Secretary, State Board of Agriculture, Guthrie, Okla.

OREGON.

OREGON. The State Board of Horticulture has charge of inspection within the state. All nursery stock brought into the state must be inspected before delivery to consignee. If found infected or infested nursery stock must be disinfected, returned to consignor or destroyed. Peach pits, peach trees and scions and other trees on peach roots grown in or coming from districts where peach yellows, peach rosette and little peach exist, and all trees affected with crown gall are prohibited entry. All nursery stock offered for sale within the state must be disinfected or treated before shipment by the use of hydrocyanic acid gas or by dipping in the standard lime-sulphur solution of winter strength for spraying. H. M. Williamson, Secretary, State Board of Horticulture, Portland, Oregon.

PENNSYLVANIA.

PENNSYLVANIA. Nurseries must be inspected at least once a year, and no nurseryman can legally sell or ship stock without a certificate of inspection. Shipments of nursery stock into the state must be plainly labeled on the outside with the name of the consignor and consignee and a certificate showing that the contents have been inspected. Certificates or affidavits of fumigation are required to accompany shipments from other states, and the word "fumigated" printed or stenciled on the certificate of inspection will not be accepted unless it is apparent that such word is a part of the certificate granted by a state inspection officer. Nurserymen from other states are required to file affidavits that all nursery stock of kinds subject to infestation by San Jose scale will be properly fumigated before shipment into the state. Blanks furnished upon application. Dealers in nursery stock are furnished certificates under certain restrictions. Transportation companies are required to reject all stock entering the state, unless a certificate of inspection and fumigation is attached. Prof. H. A. Surface, Economic Zoologist; Enos B. Engle, Chief Inspector, Harrisburg, Pa.

RHODE ISLAND

RHODE ISLAND. The State Board of Agriculture appoints a state nursery inspector, whose duties shall be to inspect nurseries and grant an annual certificate. Owners of nurseries who shall fumigate all stock sold by them may make affidavit to the fact and attach a copy to each package shipped in lieu of a certificate of inspection. All nursery stock shipped into the state shall bear on each package a certificate that the contents have been inspected by an authorized inspecting officer. In case nursery stock is brought within the state without such a certificate, the consignee shall return it to the consignor, provided, however, that any package or box bearing a certificate of fumigation, which meets the requirements, may be accepted as though bearing a certificate of inspection. (Chapter 1159, Laws of 1904.)

SOUTH CAROLINA.

SOUTH CAROLINA. Nurseries must be inspected annually and it is unlawful to sell or ship without a certificate. All persons outside the state must register a copy of their certificate of inspection, furnished by the authorized official of the state in which he resides, with the chairman of the Board of Entomology, which copy shall state that, in addition to inspection, the nursery stock has been fumigated under the direction of the official issuing the certificate. Upon the filing of the proper certificate as prescribed, any person outside the state dealing in nursery stock will receive official tags at cost of printing, one of which must be placed, together with a copy of his certificate of inspection, on each consignment of stock entering the state. TENNESSEE.

TENNESSEE. Nurseries inspected annually. Certificates are issued not later than November 1 and become void after August 1 of the following year. Parties shipping nursery stock into Tennessee must file duplicate certificate of inspection, signed in person by proper official, with the secretary of the State Board of Entomology, Knoxville, Tenn. A certificate of inspection must be attached to each package of nursery stock shipped into the state. All nursery stock shipped or delivered within the state must be fumigated before delivery. Prof. G. M. Bentley, State Entomologist and Plant Pathologist, Knoxville, Tenn.

TEXAS

TEXAS. Nurseries and greenhouses are inspected annually. All shipments of nursery stock originating outside the state must not only bear shipping tags showing copy of certificate of inspection from the state inspector of the state in which the shipment originates, but in addition thereto must have a tag attached showing copy of permit from Texas. The freight and express companies in this state are prohibited from receiving or delivering shipments which do not bear tags showing copy of Texas permit, and they are exempted, by law, from damages arising from refusal to deliver any such shipments. No nursery stock shall be shipped into the state by any person without first filing with the commissioner of agriculture a certified copy of a certificate of inspection from the state inspector of the state in which the shipment originates. A fee of \$5 is required for

issuance of permit to ship into the state. Agents or dealers operating in Texas for nurserymen outside of the state must procure proper agent's credentials from their nurseries, on a form approved by the commissioner of agriculture, and each agent or dealer must be prepared to present such credentials at all times. Dealers are classed as nurserymen and are required to take out permits the same as nurserymen. Greenhouses, and greenhouse plants and stocks are included for inspection by the Texas law, and all state inspectors should advise nurserymen, florists, or owners of greenhouses, that they must have a certificate of inspection from them, before they can make shipments to the state. All correspondence should be directed to the Commissioner of Agriculture, Austin, Texas.

UTAH.

UTAH. No person shall engage in the business of selling or importing nursery stock without having first obtained a license to do business in the state. Any person may obtain a license from the State Horticultural Commission, upon the payment of a fee of \$2.50 annually and by filing with the State Horticultural Commission a bond in the sum of \$500. Salesmen or agents must hold a certificate giving name and the name and address of the persons he represents, together with the license number of his principal. A copy of the certificate of inspection must be attached to each shipment. All nursery stock will be quarantined on arrival, and, if deemed necessary, disinfected or destroyed at the cost of the owner. J. Edward Taylor, Secretary of the State Horticultural Commission, Salt Lake City, Utah.

WASHINGTON.

WASHINGTON. No person, firm or corporation shall engage or continue in the business of selling as agent, solicitor, or otherwise, within the state, or importing nursery stock without first having obtained a license. Application therefor must be made to the commissioner of horticulture, accompanied by a satisfactory bond of \$1,000; each bond must be renewed annually. Such bond shall be conditioned that the principal or his agents will obey the provisions of the law, and that said principal will pay the cost of disinfection or destruction of all infested nursery stock and fruit sent into the state by said principal or his agents. The license fee for nurserymen and tree dealers shall be \$5 and for agents or salesmen, \$1. All licenses expire one year from date of issue, unless renewed upon the same terms originally provided for. Every person licensed to do business in the state must notify the commissioner of horticulture of his intention to ship nursery stock, giving the names and addresses of the persons, firms, or corporations to whom shipments are made. A copy of such notice shall be sent to the horticultural inspector of the district in which the point of destination is located. For full information address Hon. F. A. Huntley, Commissioner of Horticulture, Tacoma, Wash.

WEST VIRGINIA.

WEST VIRGINIA. Nurseries are inspected annually. Certificates shall be void after September 15 of year following the date. No person shall deliver to purchasers any nursery stock consigned into this state from points without, unless they have at least ten days before the time of delivery given notice in writing to the director of the experiment station of the number of trees in such consignment, the place from whence said stock was shipped and the destination of the same. No person growing or having in his possession with intent to sell nursery stock shall deliver the same before fumigating it. Every package of nursery stock shipped into the state shall be plainly labeled with the names of the consignor and consignee and a certificate of inspection, showing that the contents have been properly fumigated. (Laws of 1907.) Nurserymen who desire to employ traveling salesmen in the state should secure from the Secretary of State, Charleston, W. Va., information relative to license fees. Prof. J. H. Stewart, Director Agricultural Experiment Station, Morgantown, W. Va.

WISCONSIN.

WISCONSIN. If the inspector finds nursery stock infested with injurious insects or fungous diseases, he shall notify the owner and the stock shall not be sold or delivered. Transportation companies are forbidden to deliver nursery stock unless accompanied by proper certificates. Any person or corporation outside of the state may obtain a license to sell nursery stock in the state upon the payment of \$5 and filing a copy of official certificate of inspection, showing that such stock has been duly inspected by an authorized inspector. Agents or other persons selling nursery stock in the state for any nurseries outside of the state shall be required to carry a duplicate copy of a license held by his principal, the cost of which is \$1 for each duplicate. Any person importing plants from foreign countries shall notify the inspector of the arrival of such shipments. All persons engaged in selling and shipping fruit trees in the state are required to attach tags, upon which a certified copy of this state license shall be printed and each package, box or carload must have a tag attached. WYOMING.

WYOMING. Any person or firm wishing to do business in this state must first obtain a license. Licenses are issued on application for a period terminating on July 1 of the next succeeding inspection year (approximately two years.) All applications must be accompanied by the license fee (\$25.00), a bond in the sum of \$500.00 conditioned that the principal will faithfully obey the law of the state, and by a certified certificate of inspection from an authorized inspector in the state from which shipments are to be made. On receipt of these, the secretary of the state board issues authorized shipping tags, at cost. Nursery stock may not enter the state and transportation companies may not deliver unless such tag be attached to each and every box, bundle or bale. Before making shipments, secure copy of the law from the Secretary of the State Board of Horticulture, Professor Aven Nelson, Laramie, Wyo.

 AMERICAN NURSERIES

There are 2,300 commercial nurseries in the United States occupying 200,000 acres and valued at \$30,000,000 besides an investment of \$700,000 in improvements and the same amount in live stock. The value of the product of these nurseries is \$150,000,000 annually. The expenditures for labor each year is \$3,000,000. It is estimated that there are 550,000,000 trees in the orchards of the country and that there is invested in orchards \$300,000,000.

CANADIAN NURSERYMEN.

CANADA. No nursery stock shall be imported that is infested with any of the following insect pests or diseases: San Jose scale, brown-tail moth, gipsy moth, woolly aphis, West Indian peach scale, potato canker, gooseberry mildew, internal and external parasitic diseases of potato, branch canker, and blister rust of white pine. Nursery stock shall be imported only through the ports and during the periods mentioned: Vancouver, B. C. from October 1 to May 1; Niagara Falls, Ont., from October 1 to May 15; Winnipeg, Man., and St. John, N. B., from March 15 to May 15, and from October 7 to December 7; Windsor, Ont.; and St. Johns, Que., from March 15 to May 15, and from September 26 to December 7.

Importations by mail shall be subject to the same regulations. The port by which it is intended that the nursery stock shall enter shall be clearly stated on each package and notice of shipment must be sent to the Dominion Entomologist, Ottawa. European nursery stock and certain other classes of vegetation may in the case of certain ports be allowed to proceed and shall be inspected at point of destination, but must not be unpacked except in the presence of the inspector. Copies of the regulations governing the importation of nursery stock into Canada may be obtained from Dr. C. Gordon Hewitt, Dominion Entomologist, Ottawa, Canada, to whom all inquiries should be addressed.

SOME THINGS YOU OUGHT TO KNOW **If You Are in the Nursery Business.**

It goes without saying that you want to communicate with the Trade in the most direct and thoroughly effective manner, and at the least cost.

You know what it costs to print circulars, and pay the postage, and price for addressing and handling them.

You know that in most cases a circular is very short-lived—from three minutes to about eight hours—if it is even opened by the recipient.

A handsomely printed Nursery Trade Journal bristling with live news of the Trade on every page, and adjoining your business announcement therein, can carry your announcement to the Trade throughout the country in a form that will cause it to be presented for repeated reference—and at a cost much less than by the ineffective circular route.

Why in "American Fruits"—Ten Reasons

1. Largest circulation—reaching upwards of 4,000 nurserymen.

2. Publication and distribution from one to two weeks earlier than in any other similar journal.

3. Printed in three colors on enameled paper throughout; advertisements next to reading matter without extra cost.

4. The only independent Nursery Trade Journal—absolutely untrammelled—representing your individual interests equally with any other, preferring none.

5. The only publication giving the news of the Nursery Trade and special features that produce business. A business pointer in every item.

6. Its publishers have 28 years experience in journalism, covering every branch—they did not enter Nursery Trade Journalism as novices in the publishing business.

7. Its editor founded Nursery Trade Journalism in America, and has pointed the way daily from the start.

8. The manager of "American Fruits" is also manager of a Publicity Bureau which has for years prepared advertising matter for large commercial concerns. Advertisers in "American Fruits" get the benefit of this Bureau without additional cost.

9. American Fruits Publishing Company issues a Directory of Nurserymen, containing nearly 5,000 names and addresses; and thus is in direct touch with the entire trade.

10. Advertising rates in "American Fruits" are lowest and results are direct, especially when advertising in the journal is maintained for yearly term, changing copy as desired.

RECORD OF AMERICAN FRUITS

The orchards in this country contain more than 200,000,000 apple trees, 100,000,000 peach and nectarine trees, 30,000,000 plum and prune trees, 18,000,000 pear trees, 12,000,000 cherry trees and 10,000,000 trees of other species. These gave us about 200,000,000 bushels of fruit, which was worth \$85,000,000 in 1900.

Exports of fruit in 1901 were worth \$8,279,213. Last year they were worth \$23,023,586, an increase of 180 per cent. in nine years.

Berries to the amount of 600,000,000 or 700,000,000 bushels are consumed by the American public every year.

The United States sent \$1,847,000 worth of dried apples abroad in 1910.

Americans bought \$6,847,000 worth of bananas in 1901, and nearly twice as much in 1910.

"Success for the planter means increased business for the nurseryman, and the relationship between them should not terminate with the sale and delivery of the trees."—E. F. Stephens.

The Quality Grape

CATAWBA---CONCORD

The Grape for Everybody

A complete union of the grand old Catawba and the ever popular Concord. Its valuable properties are:

1. High quality—equaling in tenderness of pulp, sweet luscious flavor and aroma the Catawba, with added sweetness and juiciness.
2. Rich sparkling wine red; with abundant bloom.
3. Bunch large and compact—just like the Catawba.
4. Berry medium to large and nearly round—exactly like the Concord.
5. Season early; a little in advance of Concord.
6. Skin thin and tough; much like Catawba but thinner.
7. Berry adheres firmly to bunch; hence,
8. A superior shipper and keeper.
9. Exempt from both black-rot and brown-rot and all other diseases.
10. Vine of extreme vigor— a stronger grower than the Concord—and of ironclad hardihood.
11. A heavy annual yielder—as prolific as Concord.
12. Foliage similar to Concord and of like freedom from mildew.
13. Entirely without foxiness in odor and flavor

Catawba-Concord has been ten years under severe test and has not been found wanting in any way. In goodness it is beyond comparison; as fine in quality as the finest hothouse grapes, and as easily grown as the Concord. There is nothing like it.

Headquarters for the St. Regis Everbearing Raspberry.

A full stock of Raspberries, Blackberries grown from root cuttings, etc.
